

The EnVue series gives your boat the protection it deserves

## EnVue TPMS

### Tire Pressure Monitoring

EnVue TPMS Monitors are capable of reading tire pressures from 10 psi to 199 psi, are RS232 capable, and can display pressures in PSI, BAR or kPa. All Monitors have two low pressure alert levels, the first at 12.5% and the second at 25% drop in pressure. Each Monitor has self-tests for signal strength and Sensor packet counts.

#### EnVue TPMS Sensors

Tire Pressure Monitoring Sensors

Operating frequency = 433.92 MHz FM

Temperature range:  
-40°C to +150C (-40°F to +302°F)

Sensor batteries are internal, non-rechargeable/not replaceable

Sensor pressure range = 8 to 299 psi  
(55 to 1999 kPa, 1 to 20.3 BAR)

Accuracy = +/- 3% range up to 120 psi, +/- 5% 120 psi and higher

- Spot problems before they happen
- Take away the worry of flat tires when pulling your boat
- Know your trailer's tire pressure
- Monitor all vehicles and trailer tires including spares
- Visual and audible alarms for low and high pressures
- SIMPLE TO INSTALL
